

## Web Hosting Providers

Once your website is completed, you will need a place to “host” it. Below is a few hosting providers I recommend, be sure to visit the hosting providers website as the information I have below may not be accurate and they may have revised their hosting plans.

Read the fine print when researching hosting providers. I will assist you in setting up free web hosting through providers that offer free hosting, however if you choose a hosting provider that requires payment, you are responsible in setting up an account. I will do my best to assist you in this process and will upload your website for you.
